

# AGENDA ITEM 11

**Report to Chichester City Council Community Affairs Committee**

**14th November 2022**

**By Cllr Sarah Sharp**

**Whyke Estate Community Project**

## **Background**

This Estate which was built back in the 1940s is situated south of the railway in the south of the City. It is built around a large green space, the Whyke Oval, which has a play area and a small parade of shops with a school further to the south. A new housing development was built on the allotments on around 10 years ago. The area has never had a community centre for people to meet. A recent attempt to build a community centre on the Whyke Oval backfired and caused the Whyke Estate Community Association to fold back in 2013.

## **Need for the Project**

The attached Insight Report shows that the area is in greater need of support with higher levels of deprivation.

A survey was run in the summer of local residents with the support of the Community teams at CDD and WSCC, the Community Warden and the police which revealed there was an interest in more activities on the Estate in particular youth provision. A report on this survey is attached. There has been some anti-social behaviour in the area and having a place to meet would be a key first step to supporting the community which does have greater needs.

I have set up a survey to assess whether there is interest in setting up a community project:  
<https://www.surveymonkey.co.uk/r/C99V7C3>

## **Aim of the Project**

One of the four shops on Hardham Road has been empty since 2019. The aim of the project is to set up a new Residents Association in order to make this into a Community Space/Café along the lines of this project in Hayward's Heath: <https://bentswood.org.uk/>

The project could be run as a CIC to engage a Community Facilitator to run a community café/space to offer support to young parents and toddlers, children, teenagers, older people, mental health support, help with skills and employment, food poverty support, arts and games events. Running this as a Café would also support those people who don't have a car or who are less mobile and would like a place to meet on the Estate without having to go into the City Centre.

# AGENDA ITEM 11

## **Partners**

I have met with VAAC, Business Hot House and Hyde Foundation. Hyde is able to pilot projects such as this up to £20k working in partnership with Sussex Clubs for Young People who run similar models.

## **Outcomes**

Greater community support, cohesion and wellbeing. Reduced isolation. Better access to services, help and advice. Reduced food poverty.

## **Request**

There are very tight deadlines for this project. Chichester District Council need a proposal by 24<sup>th</sup> November 2022. If we are successful with our bid to CDC Estates for the property, the CIC would need a guarantor for the rent of the property. Given the community benefits from the project I hope that the Community Affairs Community would recommend supporting this project to the Finance Committee.

## *Local Insight for LI - West Sussex County Council*

Local Insight gives you access to interactive maps and reports at small area level. These reports show key social and economic indicators and allow you to compare the area selected to comparator areas.

### *OCSI*

Local Insight is a tool developed by Oxford Consultants for Social Inclusion (OCSI) based on a project developed jointly between OCSI and HACT.

**OCSI** develop and interpret the evidence base to help the public and community organisations deliver better services. A 'spin-out' from the University of Oxford Social Policy Institute, OCSI have worked with more than 100 public and community sector clients at local, national and international level. See [www.ocsi.co.uk](http://www.ocsi.co.uk) for more.

## *About the indicators*

Information published by government as open data – appropriately visualised, analysed and interpreted – is a critical tool for Local Authorities.

OCSI collect all local data published by more than 50 government agencies, and have identified key indicators relevant to local authorities to use in this report and the interactive webtool ([local.communityinsight.org](http://local.communityinsight.org)).

## *How we have identified the “Chichester South Ward” area*

This report is based on the definition of the “Chichester South Ward” area created by LI - West Sussex County Council, (you can view this area on the Local Insight map, through finding the area on the ‘show services’ dropdown in the top left hand corner of the map). We have aggregated data for all the neighbourhoods in “Chichester South Ward” to create the charts and tables used in this report.

Alongside data for the “Chichester South Ward”, we also show data for selected comparator areas: South East and England.

# Population: Age and gender

4

## What information is shown here?

The information on this page shows the number of people living in Chichester South Ward. These population figures provide detail of the structure of the population by broad age bands and sex.

The first information box shows the total number of people usually resident in the area, with the male female breakdown. Also shown are numbers by age, and the 'dependency ratio'. This is the ratio of non-working age (those aged 0-15 and over 65) to working age population and is useful in understanding the pressure on a productive population in providing for the costs of services and benefits used by the youngest and oldest in a population. For example, a ratio of 25% would imply one person of non-working age for every four people of working age.

The population pyramid compares the proportion of males and females by five-year age bands. The line chart shows how the population is changing over time in Chichester South Ward and comparator areas. The stacked bar chart, below, shows the age breakdown of the population in Chichester South Ward and comparator areas by broad age band.

Figure: Population by age

Source: Mid-Year Estimates (ONS) 2020

Total Population	Aged 0-15	Working age population	Aged 65+	Dependency ratio
7,527	930	4,710	1,887	0.60
48.1% male; 51.9% female	12.4% (England average = 19.2%)	62.6% (England average = 62.3%)	25.1% (England average = 18.5%)	England average = 0.60

## What information is shown here?

The information on the right shows the number of people in Chichester South Ward by ethnicity, based on each person's perceived ethnic group and cultural background.

The information boxes display the number of people who have identified themselves as White British and the number from non-White ethnic minority groups, as well as the five broad ethnic minority groups (White non-British, Mixed, Asian, Black and other ethnic groups).

The final information box shows the proportion of households where not all household members are of the same ethnicity (households with multiple ethnic groups).

The bar chart on the right shows a detailed breakdown of the percentage of people in ethnic minority groups by ethnic category.

White British	Non-White	White-non-British	Mixed
6,003	398	342	81
89.0% (England average = 79.8%)	5.9% (England average = 14.6%)	5.1% (England average = 5.7%)	1.2% (England average = 2.3%)

Asian	Black	Other ethnic group	Households with multiple ethnicities
260	28	29	205
3.9% (England average = 7.8%)	0.4% (England average = 3.5%)	0.4% (England average = 1.0%)	6.5% (England average = 8.9%)

# Population: Country of birth and household language

6

## What information is shown here?

The information on the right shows the number of people in Chichester South Ward by country of birth.

The top row information boxes display the number of people in Chichester South Ward who were born in England and outside the UK as well as the number of people with a UK passport and non-UK passport.

The second row information boxes show the language breakdown of households, identifying the number of households in Chichester South Ward with one or more members who cannot speak English.

The bar chart on the right shows a detailed breakdown of the percentage of people in Chichester South Ward born outside of England by the geographic region of birth.

Born in England	Born Outside the UK	With a UK passport	With a non-UK passport
5,793	745	5,217	507
85.9% (England average = 83.5%)	11.0% (England average = 13.8%)	77.4% (England average = 75.8%)	7.5% (England average = 8.8%)
All people in households have English as main language	At least one adult (not all) has English as main language	No adults but some children have English as main language	No household members have English as main language
2,981	77	8	73
95.0% (England average = 90.9%)	2.5% (England average = 3.9%)	0.3% (England average = 0.8%)	2.3% (England average = 4.4%)

Source: Census 2011

Figure: Population born outside England

Source: Census 2011

## What information is shown here?

The information box shows the number and percentage of migrants in Chichester South Ward and across England as a whole. A migrant is defined as a person with a different address one year before Census day. The migrant status for children aged under one in households is determined by the migrant status of their 'next of kin' (defined as in order of preference, mother, father, sibling (with nearest age), other related person, Household Reference Person).

The chart on the right shows the population turnover rate by age band. This is calculated as the rate of in or out migratory moves within England and Wales per 1,000 resident population.<sup>1</sup> Figures are based on GP patient register records. The left-hand bars (lighter colour) show people moving *out of* the area – higher values for a particular group indicate that this age-group is more likely to move away from the area. The right-hand bars (darker colour) show people moving *into* the area – higher values for a particular group indicate that this age-group is more likely to move into the area.

The data table on the top right and the chart on the bottom right show the total number of people registering with a National Insurance number who have come from overseas. This is a measure of the number of people who have migrated to the UK from overseas to work, who have registered for a National Insurance number in the local area.

Note: For the year 20/21 The NINO allocation process was disrupted as a result of the coronavirus (COVID-19) pandemic. This has resulted in a significant reduction in the number of NINOs allocated.

<sup>1</sup> Please note that there are currently no planned updates for this dataset, however we still consider it to be relevant.

People who have moved address within the last 12 months (Census 2011)
1,229
18.2% ( average = 12.3%)

Overseas migrants (National Insurance no. registrations of overseas nationals) (DWP 2020/21)
41
0.9% (average = 0.6%)

Figure: Level of inward and outward migration (by age)

Source: Population Turnover Rates – Office for National Statistics (2010)

Figure: Number of overseas nationals registering with a National Insurance Number

## What information is shown here?

The information on this page shows the composition of household types in Chichester South Ward. The information boxes contain the number of households in Chichester South Ward classified under the main household composition breakdowns. The chart shows the same information as a percentage of all households.

Pensioner households	One person households (aged under 65)	Lone parent families with dependent children
977	654	138
31.1% (England average = 20.7%)	20.8% (England average = 17.9%)	22.7% of all families with dependent children (England average = 24.5%)
Married households	Cohabiting households	Student households
758	255	52
24.1% (England average = 33.2%)	8.1% (England average = 9.8%)	1.7% (England average = 0.6%)
Source: Census 2011		

Figure: Population by household composition

## What information is shown here?

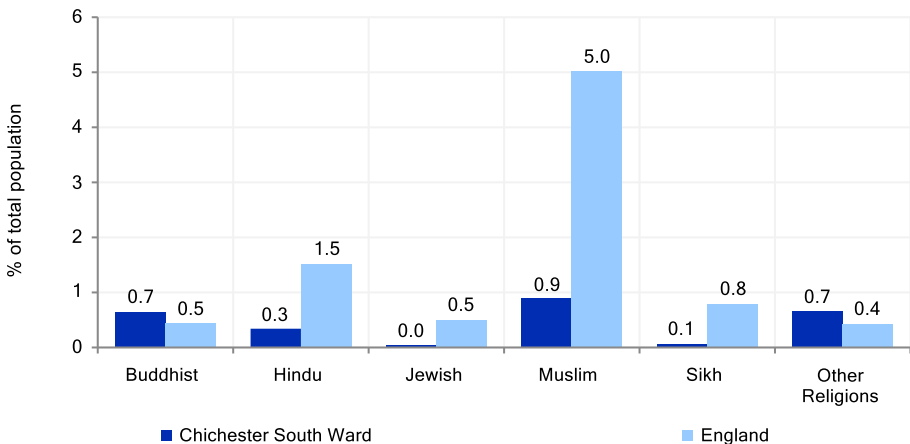

The information on the right shows the number of people living in Chichester South Ward by religious belief, categorised by the six major religions, other religion and no religion.

The bar chart shows the percentage of people in Chichester South Ward and comparator areas who are of non-Christian religious belief, displayed by religion.

*Note, figures in the table and charts may not add up to 100% because they do not include figures for those for who did not reply to the religion question – who were recorded as 'religion not stated' in the census data publication.*

Christian	Buddhist	Hindu	Jewish
4,173	44	23	3
61.9% (England average = 59.4%)	0.7% (England average = 0.5%)	0.3% (England average = 1.5%)	0.0% (England average = 0.5%)
Muslim	Sikh	Other religion	No religion
60	4	45	1,861
0.9% (England average = 5.0%)	0.1% (England average = 0.8%)	0.7% (England average = 0.4%)	27.6% (England average = 24.7%)

## What information is shown here?

The information in this section shows counts of people who are out of work and receiving workless benefits: Jobseekers Allowance (JSA)/Universal Credit (UC) and Incapacity Benefit (IB)/Employment and Support Allowance (ESA).

JSA is payable to people under pensionable age who are available for, and actively seeking, work of at least 40 hours a week. A subset of UC claimants (claimants in the 'searching for work' conditionality group) are additionally included in the 'Unemployment Benefit' count, as UC is slowly replacing JSA for new claims. *Note, 'the searching for work' conditionality group includes a small number of claimants who would not be considered unemployed under the previous JSA benefits regime e.g. those with work limiting illness awaiting health checks. Therefore, there is likely to be a slight overcount of the proportion of Unemployed Benefit claimants in areas where the UC rollout is more advanced.*

IB and ESA are workless benefits payable to people who are out of work and have been assessed as being incapable of work due to illness or disability and who meet the appropriate contribution conditions. *Note, since March 2016, ESA is being replaced by UC for new claimants. It is not possible to capture the total number of claimants of sickness benefits as the UC does not provide a breakdown for health condition; therefore, the total count of ESA/IB claimants presented here is likely to be an underestimate of the full count of those workless and receiving benefits due to sickness or disability.*

The information boxes on the top right show: the total number of adults (aged 16-64) receiving JSA and UC; the total claiming for more than 12 months; claimants aged 18-24 and 50+, the number of people receiving 'Incapacity benefits' (IB or ESA); and the number and proportion of 16-64 year olds receiving workless benefits (UC, JSA, IB or ESA).

Unemployment Benefit (JSA and UC) claimants (Sep-22)	Youth unemployment (JSA/UC) claimants aged 18-24 (Sep-22)	Older unemployed (JSA/UC claimants aged 50+) (Sep-22)
154	21	52
3.3% (England average = 3.8%)	1.8% (England average = 4.7%)	1.6% (England average = 1.5%)

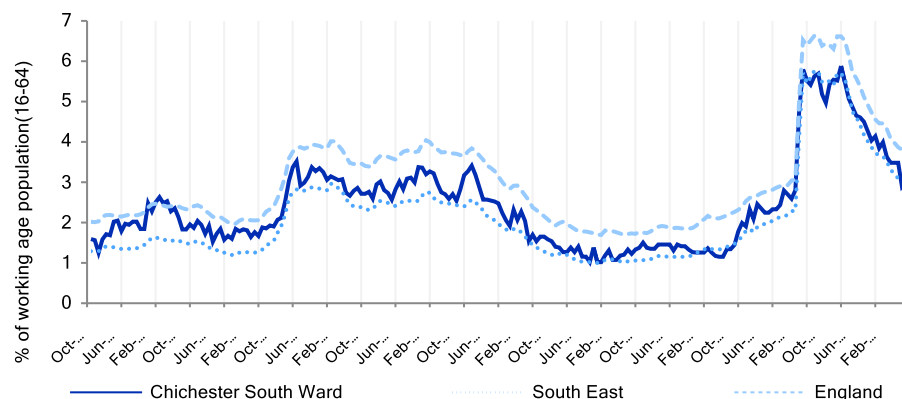

Male unemployment claimants (JSA and UC) (Sep-22)	Female unemployment claimants (JSA and UC) (Sep-22)	Working age workless benefit claimants * (Feb-22)	Incapacity benefits claimants (Feb-22)
89	67	333	145
3.8% (England average = 4.4%)	2.8% (England average = 3.2%)	7.1% (England average = 8.6%)	3.1% (England average = 4.1%)

## What information is shown here?

The information in this section looks at the prevalence of disability among people living in Chichester South Ward. There are three measures of disability presented: those claiming Attendance Allowance, Personal Independence Payments and Disability Living Allowance.

Attendance Allowance is payable to people over the age of 65 who are so severely disabled, physically or mentally, that they need a great deal of help with personal care or supervision.

Until April 2013, Disability Living Allowance was payable to children and adults in or out of work who are below the age of 65 and who were disabled, and required help with personal care or had walking difficulties. It is a non-means tested benefit, which means it is not affected by income. From April 2013 Personal Independence Payments (PIP) have been introduced to replace Disability Living Allowance for all new claimants. PIP helps with some of the extra costs caused by long-term disability, ill-health or terminal ill-health.

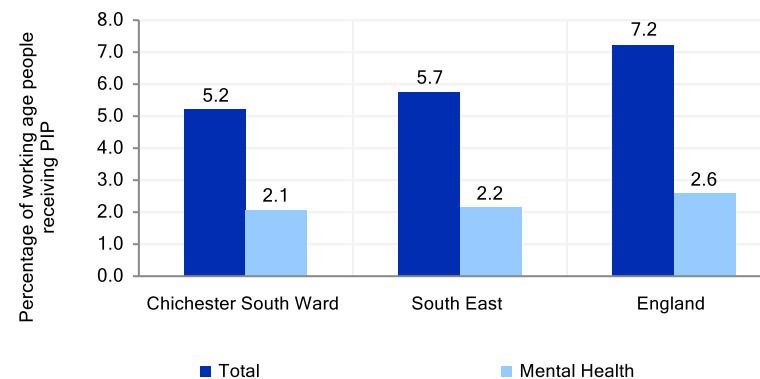

The information boxes on the right show the total number of people receiving Attendance Allowance, Disability Living Allowance and PIP (by key breakdown) and for household receiving Universal Credit due to poor physical or mental health (Limited Capability for Work Entitlement) across Chichester South Ward.

Attendance Allowance claimants (Feb-22)	Personal Independence Payment (PIP) (Jul-22)	PIP Males (Jul-22)	PIP Females (Jul-22)
221	245	90	138
11.7% of people (England= 11.5%)	5.2% of people (England= 7.2%)	3.8% of males (England= 6.6%)	5.8% of females (England= 7.8%)
PIP with mental health conditions (Jul-22)	PIP with respiratory disease (Jul-22)	Households on Universal Credit - Limited Capability for Work Entitlement (May-22)	Disability Living Allowance claimants (Feb-22)
97	05	120	162
2.1% of people (England= 2.6%)	0.1% of people (England= 0.3%)	3.6% of households (England= 3.3%)	2.2% of people (England= 2.0%)

Source: Department for Work and Pensions

Figure: Personal Independence Payment (PIP) recipients

Source: Department for Work and Pensions (Jul-22)

## What information is shown here?

The information in this page shows the proportion of people in receipt of Universal Credit against six levels of conditionality. Conditionality refers to work-related activities an eligible adult will have to do in order to get full entitlement to Universal Credit.

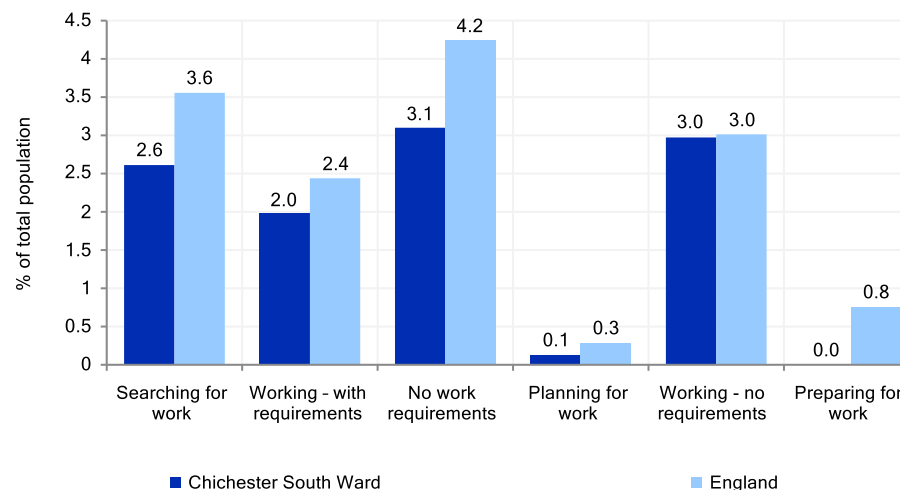

- **Searching for work:** Claimants who are not working, or with very low earnings. The claimant is required to take action to secure work - or more / better paid work. The Work Coach supports them to plan their work search and preparation activity.
- **Working with requirements:** Claimants who are in work but could earn more, or not working but has a partner with low earnings.
- **No work requirements:** Claimants who are not expected to work at present. Health or caring responsibility prevents claimant from working or preparing for work.
- **Planning for work:** Claimants who are expected to work in the future. Lone parent / lead carer of child aged 1 (Aged 1 - 2, prior to April 2017). The claimant is required to attend periodic interviews to plan for their return to work.
- **Working no requirements:** Claimants whose individual or household earnings is over the level at which conditionality applies. Required to inform DWP of changes of circumstances, particularly if at risk of decreasing earnings or losing job.
- **Preparing for work:** Claimants who are expected to start preparing for future even with limited capability for work at the present time or a child aged 2 (Aged 3 - 4, prior to April 2017), the claimant is expected to take reasonable steps to prepare for work including Work Focused Interview.

Universal Credit claimants: Searching for work (Sep-22)	Universal Credit claimants: Working with requirements (Sep-22)	Universal Credit claimants: No work requirements (Sep-22)
123	93	146
2.6% (England average = 3.6%)	2.0% (England average = 2.4%)	3.1% (England average = 4.2%)
Universal Credit claimants: Planning for work (Sep-22)	Universal Credit claimants: Working no requirements (Sep-22)	Universal Credit claimants: Preparing for work (Sep-22)
6	140	0
0.1% (England average = 0.3%)	3.0% (England average = 3.0%)	0.0% (England average = 0.8%)

Figure: Working age population claiming Universal Credit by conditionality breakdown

Source: Department for Work and Pensions

## What information is shown here?

The information in this page shows a breakdown of Universal Credit (UC) households by type and criteria.

- **Carer Entitlement:** Households on UC containing household members who have regular and substantial caring responsibilities for at least 35 hours per week. Only one carer element is allowed per individual; in joint claims, two carer elements can be included providing both partners are not caring for the same disabled person.
- **Child Entitlement:** Households on UC where a child element is included in a Universal Credit award where there is responsibility for a child or qualifying young person who normally lives in the household.
- **Disabled Child Entitlement:** Households on UC where a child element is included in a Universal Credit award and the child element is increased by a disabled child addition if a child meets the criteria.
- **Housing Entitlement, Private rented:** Households on UC that are renting privately and eligible for housing entitlement. This element is to help with housing costs.
- **Housing Entitlement, Social rented:** Households on UC that are renting social housing and eligible for housing entitlement. This element is to help with housing costs.
- **Single with dependent children:** Households on Universal Credit that comprise a single person with child dependant(s).

UC households: Carer Entitlement (May-22)	UC households: Child Entitlement (May-22)	UC households: Disabled Child Entitlement (May-22)
31	178	5
0.9% (England average = 1.7%)	5.3% (England average = 8.1%)	0.1% (England average = 0.7%)

  

UC households: Housing Entitlement, Private (May-22)	UC households: Housing Entitlement, Social (May-22)	UC households: Single, dependent children (May-22)
131	169	101
3.9% (England average = 5.7%)	5.0% (England average = 5.5%)	3.0% (England average = 5.9%)

Source: Department for Work and Pensions (DWP)

Figure: Total households claiming Universal Credit by type and criteria breakdown

Source: Department for Work and Pensions

## What information is shown here?

The information in this page shows the number of people in receipt of key welfare benefits payable by the Department for Work and Pensions (DWP).

Working age DWP Benefits are benefits payable to all people of working age (16-64) who need additional financial support due to low income, worklessness, poor health, caring responsibilities, bereavement or disability.

Universal Credit (UC) has replaced legacy benefits for new claimants. The UC rollout began in April 2013, with single jobseeker's moving on to the new benefit and by March 2016 the rollout intensified to include other groups who are out of work or on low incomes. The chart on the right shows a breakdown of the proportion of UC claimants that are either in employment or unemployed across Chichester South Ward and comparator areas.

Housing Benefit (HB) can be claimed by a person if they are liable to pay rent and if they are on a low income and provides a measure of the number of households in poverty.

Income Support is a measure of people of working age with low incomes and is a means tested benefit payable to people aged over 16 working less than 16 hours a week and having less money coming in than the law says they need to live on.

The charts on the following page show the change in the proportion of Income Support and Housing Benefits claimants across Chichester South Ward and comparator areas. *Note, recent changes observed in these charts can be partially attributed to the migration of claimants from legacy working age DWP benefits, Housing Benefit and Income Support towards Universal Credit.*

Universal Credit claimants – in Employment (Aug-22)
255
5.4% (England average = 5.8%)

Universal Credit claimants – Unemployed (Aug-22)
303
6.4% (England average = 8.3%)

Income Support (IS) claimants (Feb-22)
15
0.3% (England average = 0.5%)

Housing Benefit claimants (May-22)
388
11.5% (England average = 9.5%)

Universal Credit claimants (Sep-22)
564
12.0% (England average = 14.3%)

## What information is shown here?

The information on this page looks at overall levels of deprivation across Chichester South Ward based on the Index of Multiple Deprivation (IMD) 2019. IMD 2019 is the most comprehensive measure of multiple deprivation available. The concept of multiple deprivation upon which the IMD 2019 is based is that separate types of deprivation exist, which are separately recognised and measurable. The IMD 2019 therefore consists of seven types, or domains, of deprivation, each of which contains a number of individual measures, or indicators.<sup>2</sup>

The information boxes on the right show the number of people in Chichester South Ward living in neighbourhoods ranked among the most deprived 20% of neighbourhoods in England on IMD 2019 and the seven IMD domains. The chart on the right shows the number of people living in neighbourhoods grouped according to level of deprivation. The charts on the following pages show the same information for each of the domains. All neighbourhoods in England are grouped into ten equal sized groups “deciles”; the 10% of neighbourhoods with the highest level of deprivation (as measured in the IMD) are grouped in decile 10, and so on with the 10% of neighbourhoods with the lowest levels of deprivation grouped in decile 1.

Number of people in Chichester South Ward living in the most deprived 20% of areas of England by Indices of Deprivation (ID) 2019 domain			
Index of Multiple Deprivation	Income domain	Employment domain	Education domain
0	0	0	1,637
(England average = 20.0%)	(England average = 20.0%)	(England average = 19.5%)	21.8% (England average = 19.8%)

## What information is shown here?

This page looks at children in low-income families, out of work households and lone parent households. Relative low income is defined as a family in low income Before Housing Costs (BHC) in the reference year. Absolute low income is a family in low income Before Housing Costs (BHC) in the reference year in comparison with incomes in 2010/11. A family must have claimed one or more of Universal Credit, Tax Credits or Housing Benefit at any point in the year to be classed as low income in these statistics. Children are dependent individuals aged under 16; or aged 16 to 19 in full-time non-advanced education.

This is the first release of these statistics, which have replaced DWP's Children in out-of-work benefit households and HMRC's Personal Tax Credits: Children in low-income families local measure. See here for more information:

<https://www.gov.uk/government/collections/children-in-low-income-families-local-area-statistics#release>

The information boxes on the right show the count of people in each of these categories in Chichester South Ward. The bar chart shows the percentage of children in relative and absolute low-income families.

Children in relative low income families	Children in absolute low income families	Children in relative low income lone parent families	Children in relative low income out of work families
169	131	81	29
12.6% (England average = 18.7%)	9.7% (England average = 15.4%)	47.9% of relative low-income families (England average = 40.2%)	17.2% of relative low-income families (England average = 30.6%)

## What information is shown here?

The information on this page looks at pensioner groups including those that may face greater risks or who may have different types of need. There are three measures included: pensioners without access to transport, pensioner loneliness and pensioners in poverty.

Pensioners without access to transport are those with no access to a car or van. The dataset only includes pensioners living in private households.

There are two indicators of pensioner loneliness. The census provides a measure of the proportion of pensioners living alone (defined as households of one pensioner and no other household members). In addition, Age Concern have developed a Loneliness Index (which predicts the prevalence of loneliness amongst people aged 65+) based on census data. Areas with a value closer to 0 predict a greater prevalence of loneliness amongst those aged 65 and over and living in households compared to areas with a value further away from 0.

Pensioners in poverty are those in receipt of Pension Credit. Pension Credit provides financial help for people aged 60 or over whose income is below a certain level set by the law.

The information boxes present information on the counts of pensioner households or pensioners in each category. The chart on the top right shows the change in the proportion of people receiving Pension Credit across Chichester South Ward and comparator areas.

The chart on the bottom right compares Loneliness Index scores across Chichester South Ward and comparator areas - a value closer to 0 predicts a greater prevalence of loneliness amongst those aged 65.

Private pensioner households with no car or van (Census 2011)	Households of one pensioner (Census 2011)	State pension claimant (DWP Nov-20)	Pension credit claimant (DWP Feb-22)
601	713	1,763	228
41.0% of pensioner households (England average = 40.8%)	73.0% of pensioner households (England average = 59.6%)	93.4% (England average = 92.5%)	12.1% (England average = 11.3%)

## Vulnerable groups: Households with multiple needs

### What information is shown here?

The information on this page looks at household deprivation and households with multiple deprivation.

The information boxes show the number of households which are deprived in one of the four Census 2011 deprivation dimensions. The Census 2011 has four deprivation dimension characteristics: a) Employment: Any member of the household aged 16-74 who is not a full-time student is either unemployed or permanently sick; b) Education: No member of the household aged 16 to pensionable age has at least 5 GCSEs (grade A-C) or equivalent AND no member of the household aged 16-18 is in full-time education c) Health and disability: Any member of the household has general health 'not good' in the year before Census or has a limiting long term illness d) Housing: The household's accommodation is either overcrowded; OR is in a shared dwelling OR does not have sole use of bath/shower and toilet OR has no central heating. These figures are taken from responses to various questions in census 2011.

Households with multiple deprivation are households experiencing four key measures of deprivation:

- All adult household members have no qualifications
- At least one household member is out of work (due to unemployment or poor health)
- At least one household member has a limiting long-term illness
- The household is living in overcrowded conditions

Household is not deprived in any dimension (Census 2011)	Household is deprived in 1 dimension (Census 2011)	Household is deprived in 2 dimensions (Census 2011)	Household is deprived in 3 dimensions (Census 2011)
1,441	1,074	515	100
45.9% (England average = 42.5%)	34.2% (England average = 32.7%)	16.4% (England average = 19.1%)	3.2% (England average = 5.1%)

Households suffering multiple deprivation (Census 2011)
09
0.3% (England average = 0.5%)

## What information is shown here?

The information on this page looks at the number and proportion of people in two groups with specific needs: mental health issues and people providing unpaid care.

The figures for people with mental health issues are based on Employment Support Allowance/Incapacity Benefit claimants who are claiming due to mental health related conditions. Incapacity Benefit is payable to persons unable to work due to illness or disability.

Informal care figures show people who provide any unpaid care by the number of hours a week they provide that care. A person is a provider of unpaid care if they give any help or support to another person because of long-term physical or mental health or disability, or problems related to old age.

The line chart on the right shows the change in the number of people claiming Incapacity benefit for mental health reasons as a proportion of the working age population and the chart below it includes figures for children and all people providing unpaid care across Chichester South Ward.

Mental health related benefits (DWP Feb-22)	People providing unpaid care (Census 2011)	Unpaid care (50+ hours per week) (Census 2011)
77	657	115
1.6% of working age adults (England average = 2.0%)	9.7% (England average = 10.2%)	1.7% (England average = 2.4%)

## What information is shown here?

The information on this page looks at the type of dwelling space people live in. A dwelling space is the accommodation occupied by an individual household or, if unoccupied, available for an individual household, for example the whole of a terraced house, or a flat in a purpose-built block of flats.

The information boxes to the right show the number of people in Chichester South Ward living in each accommodation type. The chart on the right shows a breakdown of households by accommodation type across Chichester South Ward and comparator areas.

Detached	Semi-detached	Terraced	Purpose built flat
360	891	938	955
10.6% (England average = 22.3%)	26.3% (England average = 30.7%)	27.6% (England average = 24.5%)	28.1% (England average = 16.7%)
Flat (in converted house)	Flat (in commercial property)	Caravan or other temporary dwelling	Second homes (2001)
167	79	03	28
4.9% (England average = 4.3%)	2.3% (England average = 1.1%)	0.1% (England average = 0.4%)	0.9% (England average = 0.6%)

## What information is shown here?

The information on this page looks at the tenure of housing in Chichester South Ward. The information boxes show the number of households broken down by tenure type and the chart shows the tenure breakdown across Chichester South Ward and comparator areas.

- 'Owner occupied' housing includes accommodation that is either owned outright, owned with a mortgage or loan, or shared ownership (paying part rent and part mortgage).
- 'Social rented' housing includes accommodation that is rented from a council (Local Authority) or a Housing Association, Housing Co-operative, Charitable Trust, Non-profit housing company or Registered Social Landlord.
- 'Rented from the Council includes accommodation rented from the Local Authority
- 'Housing Association or Social Landlord' includes rented from Registered Social Landlord, Housing Association, Housing Co-operative, Charitable Trust and non-profit housing Company.
- 'Private rented or letting agency' includes accommodation that is rented from a private landlord or letting agency.
- 'Other Rented' includes employer of a household member and relative or friend of a household member and living rent free.

Owner occupied	Owner-occupied: owned outright	Owner-occupied owned: with mortgage or loan
1,832	1,118	698
58.4% (England average = 64.1%)	35.6% (England average = 30.6%)	22.2% (England average = 32.8%)
Owner-occupied: shared ownership	Social rented households	Rented from Council
16	628	92
0.5% (England average = 0.8%)	20.0% (England average = 17.7%)	2.9% (England average = 9.4%)
Rented from Housing Association or Social Landlord	Rented from private landlord or letting agency	Other rented dwellings
536	563	116
17.1% (England average = 8.3%)	17.9% (England average = 15.4%)	3.7% (England average = 2.8%)

# Housing: How affordable is local housing? (1)

26

## What information is shown here?

The information in this section shows measures of housing costs in Chichester South Ward. Data on house prices is from the Land Registry open data price-paid dataset ([www.landregistry.gov.uk/market-trend-data/public-data/price-paid-data](http://www.landregistry.gov.uk/market-trend-data/public-data/price-paid-data)), which is updated monthly.

## House prices by dwelling type

The information boxes on the right and the top-left chart on the following page show the mean house prices by accommodation type across Chichester South Ward and comparator areas for four key dwelling types (detached houses, semi-detached houses, flats and terraced houses). The bottom-left chart on page 25 shows the 10-year inflation adjusted average change in house prices across Chichester South Ward and comparator areas.

The top-right chart on page 25 displays the monthly change in the number of transactions and average price across Chichester South Ward and the bottom-right chart displays the ratio of the number of residential property transactions (Land Registry Sep-21 to Aug-22) to the number of owner occupied and privately rented dwellings (Census 2011) – an approximate measure of the proportion of housing stock that has change hands of the year, or the housing 'churn'.

## Council tax bands

The data on Council Tax bands shows the number and proportion (as a percentage of all rateable households) of houses in bands A, B or C (the lowest price bands) and F, G and H (the highest price bands) locally. These price bands are set nationally, so can be used to show how the cost of all local property (not just those properties that have recently been sold) compares with other areas; the chart on the right compares Chichester South Ward and comparator areas for these Council Tax bands.

Average house price (all types of housing) (Land registry Sep-21 to Aug-22)	Average house price (detached) (Land registry Sep-21 to Aug-22)	Average house price (flats) (Land registry Sep-21 to Aug-22)
<b>£420,202</b>	<b>£674,714</b>	<b>£246,705</b>
England average = £344,917	England average = £523,605	England average = £295,523
Average house price (semi-detached) (Land registry Sep-21 to Aug-22)	Average house price (terraced) (Land registry Sep-21 to Aug-22)	Households in Council Tax Band A (Valuation Office Agency (VOA) 2022)
<b>£473,652</b>	<b>£535,800</b>	<b>210</b>
England average = £308,752	England average = £285,244	5.6% (England average = 24.0%)
Households in Council Tax Band B (VOA 2022)	Households in Council Tax Band C (VOA 2022)	Households in Council Tax Band F-H (VOA 2022)
<b>590</b>	<b>1,440</b>	<b>342</b>
15.8% (England average = 19.5%)	38.5% (England average = 21.9%)	9.1% (England average = 9.3%)

## What information is shown here?

The information in this section combines measures of local house prices and local earnings to provide a more balanced picture of housing affordability.

There are three indicators displayed here: **housing affordability gap**, **savings ratio** and **total affordability ratio**. Each of these indicators is given for two measures of house price: the average (median) house price and the lower quartile house price. The lower quartile house price is set such that the cheapest 25% of houses fall within this price and is a measure of the cost of cheaper, more affordable housing in the area.

**Housing affordability gap:** An estimate of the gap between the cost of local houses and the amount residents can borrow. This is defined as the difference between the local house price (either median or lower quartile) and 4.5 times local annual earnings (mortgage lenders are typically willing to lend 4-5 times annual salaries). Higher figures represent more unaffordable houses.

**Savings ratio:** The ratio between 15% of the house price (an estimate of the savings required for a deposit) and monthly earnings. It can be interpreted as the number of months' worth of earnings required for a deposit (not accounting for inflation or changes in earnings or house prices).

**Total affordability ratio:** This is the ratio between the total house price and annual earnings. It can be interpreted as the number of years' worth of earnings required for a deposit (not accounting for inflation or changes in earnings or house prices).

The data for these measures come from the ONS House Price Statistics for Small Areas (HPSSA) and ONS Income Estimates. Earnings data is published at MSOA level and house price data is published at LSOA level and above) Where necessary, we have modelled data to LSOA and OA geographies. The methodology used to produce these statistics is based ONS's housing affordability analysis.

Lower quartile house price ('affordable housing')	Average house price
Affordability gap	Affordability gap
£56,335	£113,061
England average = -£39,328	England average = £42,272
Savings ratio (months of earnings for a deposit)	Savings ratio (months of earnings for a deposit)
11.24	14.26
England average = 6.54	England average = 10.41
Total ratio (years of earnings for a house)	Total ratio (years of earnings for a house)
5.88	7.28
England average = 3.57	England average = 5.5

Figure: Housing affordability gap for lower quartile house prices and average house prices.

## What information is shown here?

The information on this page details indicators of the built environment: overcrowded housing, vacant housing, population density, the size of housing units and the proportion of households lacking central heating.

A household's accommodation is described as 'without central heating' if it had no central heating in any of the rooms (whether used or not). The data also shows breakdowns by tenure. This enables users to compare differences in the proportion of households with inadequate heating supply in the owner occupied, social rented and private rented sectors.

Households are classified as overcrowded if there is at least one room fewer than needed for household requirements using standard definitions. The standard used to measure overcrowding is called the 'occupancy rating' which relates to the actual number of rooms in a dwelling in relation to the number of rooms required by the household, taking account of their ages and relationships. The room requirement states that every household needs a minimum of two common rooms, excluding bathrooms, with bedroom requirements that reflect the composition of the household. The occupancy rating of a dwelling is expressed as a positive or negative figure, reflecting the number of rooms in a dwelling that exceed the household's requirements, or by which the home falls short of its occupants' needs.

Vacant dwellings are households that do not have any usual residents. This includes households that may still be used by short-term residents, visitors who were present on census night, or a combination of short-term residents and visitors. It also includes vacant household spaces and household spaces that are used as second addresses.

Population density (persons / hectare)	Houses lacking central heating	Overcrowded Housing	Vacant Dwellings
27.4	72	269	254
England average = 4.3	2.3% (England average = 2.7%)	8.6% (England average = 8.7%)	7.5% (England average = 4.3%)
Dwellings with 2 rooms or fewer	Dwellings with 8 or more rooms	Average dwelling size (persons)	
150	257	2.10	
4.8% (England average = 3.7%)	8.2% (England average = 12.7%)	England average = 2.36 people)

# Housing: Domestic gas and electricity consumption

## What information is shown here?

The Department for Business, Energy and Industrial Strategy publishes small area estimates of domestic gas and electricity consumption in megawatt hours (Mwh). Gas consumption data are weather corrected annual estimates of consumption for all domestic meters. A similar methodology is used for collecting domestic electricity consumption data; however, these values are not weather corrected. The methodologies are sufficiently similar that summing the electricity consumption and gas consumption gives an estimate of total annual energy consumption.

The data on this page were originally published by BEIS at postcode level and have been designated as experimental statistics. Experimental statistics are statistics that are new and subject to possible changes to meet user needs or that do not meet the rigorous quality standards of National Statistics. To avoid disclosure, postcodes are excluded if they contain less than 6 meters or that have average consumption figures of 0 or 1.

The estimated number households not connected to the gas network is based on the difference between the number of households and the number of domestic gas meters.

To read more about the data and methodology here please visit <https://www.gov.uk/government/collections/sub-national-electricity-consumption-data>

Electricity consumption (Mwh)	Gas consumption (Mwh)	Households not connected to the gas network
7,686	34,592	0,561
(3.59 Mwh per meter) England average = 3.78 Mwh per meter	(12.57 Mwh per meter) England average = 13.66 Mwh per meter	(15.20% of households) England average = 12.43%

Source: Department for Business, Energy and Industrial Strategy, 2020 (consumption), Not connected to gas network, 2020  
Figure: Domestic gas and electricity consumption, 2020

## What information is shown here?

This page details the energy efficiency ratings of domestic buildings within Chichester South Ward.

The data are taken from Energy Performance Certificates (EPC) for domestic buildings published by MHCLG at postcode level and have been aggregated to Output Areas. These include those recorded between January 2017 and December 2021. The definitions of the measures on the right are given below.

The energy efficiency rating, expressed in Standard Assessment Procedure (SAP) points, is a score between 1-100 with 1 being poor energy efficiency and 100 being excellent energy efficiency. The current average rating of buildings is given alongside the potential rating (if improvements to the buildings were made) and the difference between the two - the 'energy efficiency gap'.

The number and proportion of buildings have been split into three bands of energy efficiency rating; A-C, D-E and F-G, where band 'A' EPC rating is the most efficient. Please be aware that these figures do not account for all domestic buildings in an area.

Only homes that have been built, bought, sold or retrofitted since 2008 have an EPC, which represents about 50 to 60 per cent of homes within a local authority area. Additionally, data has not been published where the holder of the energy certificate has opted-out of disclosure, energy certificates are excluded on grounds of national security or energy certificates are marked as "cancelled" or "not for issue". Only postcodes that match the ONS postcode file directory have been included.

Energy efficiency rating, current (SAP points)	Energy efficiency rating, potential (SAP points)	Energy efficiency gap (SAP points)
65.62	80.13	14.51
England average = 64.15	England average = 81.65	England average = 17.51

Band A-C buildings	Band D-E buildings	Band F-G buildings
835	915	68
(45.93%) England average = 47.19%	(50.33%) England average = 49.47%	(3.74%) England average = 3.34%

Source: MHCLG. Data collected between Jan 2017- Dec 2021.

Figure: Energy efficiency rating (SAP points)

## What information is shown here?

The information on this page shows the number of people living in communal establishments, with breakdowns by the main types.

A communal establishment is defined as an establishment providing managed (full-time or part-time supervised) residential accommodation.

The information boxes on the right show the number and proportion of people in communal establishments by main type of establishment. Medical and care establishments include psychiatric hospital / homes, other hospital homes children's homes, residential care homes, nursing homes managed by the NHS, Local Authority or private organisation; Educational establishments include primarily University halls of residence; Defence establishments include barracks, air bases and naval ships; Other establishments include prison service establishments, bail hostels, hotels, boarding houses or guest houses, hostels and civilian ships.

The chart on the top right provides the same information with associated comparator areas.

All in communal establishments	Medical and care establishments	Education establishments	Defence establishments	Other establishments
335	124	197	00	14
5.0% (England average = 1.8%)	1.8% (England average = 0.7%)	2.9% (England average = 0.7%)	0.0% (England average = 0.1%)	0.2% (England average = 0.1%)

## What information is shown here?

The information on this page and the following shows the level of recorded crime in Chichester South Ward and comparator areas. This is based on data for individual crime incidents published via the [www.police.uk](https://www.police.uk) open data portal, which has been linked by Local Insight to selected neighbourhoods. Further information on how these crimes and incidents have been categorised, as well as which crimes and incidents have been mapped and why, is available at: [www.police.uk/about-this-site/faqs/#why-are-some-crimes-not-displayed-on-the-map](https://www.police.uk/about-this-site/faqs/#why-are-some-crimes-not-displayed-on-the-map)

The information boxes show counts and rates for the main crime types and anti-social behaviour incidents. The overall crime rate is presented for monthly, quarterly and annual snapshots, with the underlying crime types shown as annual totals.

The line charts to the right and on the following page track monthly change in recorded crime across five key offences (violent crime, anti-social behaviour, burglaries, criminal damage and vehicle crime) across Chichester South Ward and comparator areas.

Note: Police.uk crime counts were not recorded for Greater Manchester Police due to a change in IT systems no crime, outcome or stop and search data is available from July 2019 onwards. West Midlands: Due to recent major system changes Crime and Stop & Search data is unavailable from April 2021 onwards. Please see <https://data.police.uk/changelog/> for more details.

<b>All crimes</b> August 2022 monthly total <b>92</b> 12.7 per 1,000 population (England average = 9.2)	<b>All crimes</b> Jun-22 to Aug-22 <b>372</b> 51.2 per 1,000 population (England average = 27.4)	<b>All crimes</b> Sep-21 to Aug-22 <b>1,635</b> 217.2 per 1,000 population (England average = 95.7)
<b>Violent crimes</b> Sep-21 to Aug-22 <b>493</b> 65.5 per 1,000 population (England average = 33.3)	<b>Criminal damage incidents</b> Sep-21 to Aug-22 <b>124</b> 16.5 per 1,000 population (England average = 7.8)	<b>Anti-social behaviour incidents</b> Sep-21 to Aug-22 <b>282</b> 37.5 per 1,000 population (England average = 16.8)
<b>Burglaries</b> Sep-21 to Aug-22 <b>42</b> 12.5 per 1,000 households (England average = 9.6)	<b>Robberies</b> Sep-21 to Aug-22 <b>20</b> 2.7 per 1,000 population (England average = 1.0)	<b>Vehicle crimes</b> Sep-21 to Aug-22 <b>64</b> 8.5 per 1,000 population (England average = 5.7)

## What information is shown here?

The information in this section explores variations in life expectancy and premature mortality. Life expectancy is a measure of the age a person born today can expect to live until, if they experience current mortality rates throughout their life. The chart on the right shows life expectancy at birth for females and males in Chichester South Ward and comparator areas.

The first chart on the following page shows the standardised mortality ratio for all causes and all ages for Chichester South Ward. This indicator highlights the ratio of observed to expected deaths (given the age profile of the population). A mortality ratio of 100 indicates an area has a mortality rate consistent with the age profile of the area, less than 100 indicates that the mortality rate is lower than expected and higher than 100 indicates that the mortality rate is higher than expected.

The second chart on the following page show incidence of cancer (with breakdowns for the most common forms of cancer). The data is presented as an incidence ratio (ratio of observed incidence vs expected incidence given the age profile of the population).

Figure: Healthy Life Expectancy

Source: Office for National Statistics (2009-2013)

Figure: Incidence of cancer: Standardised incidence ratio (select causes)

Source: Office for National Statistics (2012-2016)

If an area is above 100, there is a higher incidence of cancer than had been expected. If it is below 100, there is a lower incidence of cancer than expected.

Figure: Standardised mortality ratio (select causes)

Source: Office for National Statistics (2015-2019)

If an area is above 100, there is a higher proportion of deaths than had been expected. If it is below 100, there is a lower proportion of deaths than expected.

## What information is shown here?

The information in this section looks at general levels of health, focusing on the number of people living in neighbourhoods with poor levels of overall health (health deprivation hotspots) and the number of people with a limiting long-term illness.

Limiting long-term illness is defined as any long-term illness, health problem or disability which limits someone's daily activities or the work they can do. Health deprivation 'hotspots' are neighbourhoods ranked among the most deprived 20% of neighbourhoods in England on the Indices of Deprivation 2015 Health domain. The domain measures morbidity, disability and premature mortality. All neighbourhoods in England are grouped into ten equal sized groups "deciles"; the 10% of neighbourhoods with the highest level of health deprivation are grouped in decile 10, and so on with the 10% of neighbourhoods with the lowest levels of health deprivation grouped in decile 1.

The chart on the right shows the number of people in Chichester South Ward living in each health decile. The charts below shows the proportion of residents in Chichester South Ward with a limiting long-term illness by age.

Number of people living in health deprivation 'hotspots' (Indices of Deprivation 2015)	People with a limiting long-term illness (Census 2011)	People aged 16-64 with a limiting long-term illness (Census 2011)	Babies born with a low birth weight (ONS 2011-2015)
2,339	1,312	452	0
31.1% (England average = 19.6%)	19.5% (England= 17.6%)	10.7% (England= 12.7%)	0.0% (England= 2.8%)

## What information is shown here?

The information in this section looks at admissions to hospital by main health condition and hospital admissions and A&E attendance rates for children (aged under 5 years). The chart on the top right shows emergency admissions to hospital across Chichester South Ward and comparators. The chart on the bottom right shows elective in-patient hospital admissions (admissions that have been arranged in advance).

The data are presented as standardised ratios; a ratio of 100 indicates an area has an admission rate consistent with the national average, less than 100 indicates that the admission rate is lower than expected and higher than 100 indicates that the admission rate is higher than expected.

The information boxes at the bottom show the rate of emergency hospital admissions and A&E attendances for children (aged under 5 years) per 1,000 resident population in Chichester South Ward. Approximately 35% of all admissions in the NHS in England are classified as emergency admissions, costing approximately £11 billion a year. Over one quarter of emergency hospital admissions in children aged under 5 years in 2014/15 was for respiratory infections. A&E attendances in children aged under five years are often preventable, and commonly caused by accidental injury or by minor illnesses which could have been treated in primary care.

Emergency hospital admissions for children under 5 (per 1,000 population)	A&E attendance for children under 5 (per 1,000 population)
266	533
(England = 162)	(England = 630)

If an area is above 100, there is a higher proportion of admissions than had been expected. If it is below 100, there is a lower proportion of admissions than expected.

## What information is shown here?

Arthritis UK have partnered with Imperial College London to produce modelled estimates of the prevalence of musculoskeletal conditions for MSOAs in England. The estimates were calculated by identifying risk factors, sourcing suitable data sources and using statistical techniques to produce synthetic estimates of the numbers of people with hip osteoarthritis, knee osteoarthritis and back pain.

We have defined percentages consistently with Arthritis UK's methodology. **Knee and hip osteoarthritis figures are expressed as a percentage of the population aged 45 and over. Back pain figures are expressed as a percentage of the total population.**

People are deemed to have severe pain if they have pain most of the time or they are unable to walk a quarter of a mile unaided or they have previously undergone hip or knee replacement due to arthritis.

For more information visit <https://www.arthritisresearchuk.org/arthritis-information/data-and-statistics/musculoskeletal-calculator.aspx>

## What information is shown here?

The information on this page looks at lifestyle behaviours of people living in Chichester South Ward. Lifestyle behaviours are risk factors which play a major part in an individual's health outcomes and will have varying physical and psychological consequences.

The chart on the top right shows the healthy eating levels (consumption of five or more portions of fruit and vegetables a day among adults) in Chichester South Ward. It also shows smoking prevalence and levels of binge drinking in these areas. Binge drinking is defined as the consumption of at least twice the daily recommended amount of alcohol in a single drinking session (8 or more units for men and 6 or more units for women).

The chart on the bottom right shows the percentage of people children (in reception year and year 6) and adults classified as obese in Chichester South Ward. People are considered obese when their body mass index (BMI) a measurement obtained by dividing a person's weight by the square of the person's height, exceeds 30 kg/m<sup>2</sup>.

Data for adult health are modelled estimates created from Health Survey for England 2006-2008. This is due to a lack of alternative small-area data for these indicators.

Figure: "Healthy eating" (consumptions of 5+ fruit and veg a day), binge drinking and smoking  
Source: Health Survey for England 2006-2008

Figure: Children and adults classified as obese

## What information is shown here?

The information on this page looks at further lifestyle behaviours of people living in Chichester South Ward.

The chart on the top right shows the percentage of children (in reception year and year 6) classified as overweight or obese in Chichester South Ward. This indicator shows the number of children classified as overweight (including obese) where their BMI is on or above the 85th centile of the British 1990 growth reference (UK90) according to age and sex. The indicator can be used to estimate and monitor excess weight and obesity in children in order to reduce prevalence, inform planning and delivery of services for children, and ensure the proper targeting of resources to tackle obesity.

The chart on the bottom right shows the modelled prevalence of smoking status for people aged 15 in Chichester South Ward. It shows the percentage of those aged 15 who are regular smokers or regular or occasional smokers. There is a large body of evidence showing that smoking behaviour in early adulthood affects health behaviours later in life. The Government's Tobacco Control Plan (2017) sets out their aim to reduce the number of 15 year olds who regularly smoke from 8% to 3% or less. This indicator will ensure that as well as focusing on reducing the prevalence of smoking among adults (primarily through quitting) local authorities will also address the issue of reducing the uptake of smoking among children.

## What information is shown here?

This chart shows estimates of the levels of physical activity among adults. The data have been produced by Sport England using a Small Area Estimation technique - modelling down from a National Survey (the Active Lives Survey 2020) to Middle Layer Super Output Area (MSOA) based on the local demographic characteristics of the local population. For more information on the modelling method see

<https://www.sportengland.org/know-your-audience/data/active-lives/active-lives-data-tables>

The categories of physical activity follow the guidelines set by the Chief Medical Officer and are defined below:

**Physically active:** undertaking at least 150 minutes per week in the past month excluding gardening

**Physically inactive:** undertaking less than 30 minutes in the past month excluding gardening

**Physical activity at least twice a month:** undertaking physical activity on at least two occasions in the past month

Figure: Physical activity among adults

Source: Sport England (Active Lives Survey 2020) – small area data 2018/2019

## What information is shown here?

The information on this page looks at the estimated prevalence of a different health conditions in Chichester South Ward.

The estimates calculated are based on the number of people listed on GP registers in 2019/20, and the number of people recorded as having the relevant health conditions. The data from England's GP practices was published by NHS digital. As the data is for 2019/20, it may be affected by the beginning of the COVID-19 pandemic.

It should be noted that these are only estimates and that they are sensitive to the accuracy of GP data reporting. For some conditions (e.g. obesity and dementia), GP-recorded prevalence is lower than the proportion of people living with the condition.

For full notes, methodology, and limitations, please see

<https://commonslibrary.parliament.uk/social-policy/health/diseases/constituency-data-how-healthy-is-your-area> for more details.

The bar chart on the right shows a detailed breakdown of the estimated percentage of prevalence by category of health condition.

Figure: % of estimated disease prevalence

## What information is shown here?

The information on this page looks at the index of 'Access to Health Assets and Hazards' (AHAH) Version 3, a multidimensional index produced by the CDRC that measures how 'healthy' neighbourhoods are by looking at accessibility and geographical determinants of health. It combines indicators under four different domains of accessibility:

- Retail environment: access to fast food outlets, pubs, off-licences, tobacconists and vape stores, gambling outlets,
- Health services: access to GPs, hospitals, pharmacies, dentists, leisure services, and
- Physical environment: access to Blue Spaces, Green Spaces - Passive (total green space areas available to each postcode in a range of a 900-metre buffer prior to creating LSOA averages),
- Air Quality: three air pollutants (Nitrogen Dioxide, Particulate Matter 10 and Sulphur Dioxide).

The information boxes on the top right show the score on each of the four domains of accessibility and the overall AHAH index score for Chichester South Ward. A higher score indicates a poorer health-related environment.

The bar chart on the right shows a detailed breakdown of the inputs for the retail environment and health services domains all of which show the mean distance in kilometres to each of these outlets and services.

For full notes, methodology, and limitations please see

<https://data.cdrc.ac.uk/dataset/access-healthy-assets-hazards-ahah> for more details.

## What information is shown here?

The information on this page shows the outcomes of children in the Early Years Foundation Stage (EYFS), a series of tests measuring children's progress in terms of Personal, Social and Emotional Development (PSED) and Communication, Language and Literacy (CLL). These are typically 5-year-old pupils; however, a minority of slightly older and younger pupils may have been assessed.

The new Early Years Foundation Stage Profile requires practitioners to make a best fit assessment of whether children are emerging, expected or exceeding against each of the new 17 Early Learning Goals (ELGs). Children have been deemed to have reached a Good Level of Development (GLD) in the new profile if they achieve at least the expected level in the ELGs in the prime areas of learning (personal, social and emotional development; physical development; and communication and language) and in the specific areas of mathematics and literacy. These are 12 of the 17 ELGs. The Department for Education has also introduced a supporting measure which measures the total number of points achieved across all 17 ELGs and reports the average of every child's total point score.

The chart on the right shows the percentage of pupils achieving 17 ELG and the percentage of pupils achieving a good level of development.

Figure: Early years foundation stage profile  
Source: Department for Education (2013-2014)

## What information is shown here?

The chart on the top right shows the education levels of pupils in Chichester South Ward, showing the examination results at Key Stage 1 (tests set at aged 7) Key Stage 2 (tests set at aged 11) and Key Stage 4 (GCSEs).

The figures show the Average Point Score of pupils from each of the Key Stage examinations. This adjusts for high achieving pupils as well as pupils achieving expected levels.

The chart on the top right shows Average Point Score (across all examinations) per pupil at Key Stage 1 and Key Stage 2. The chart on the bottom right compares the gap in Average Point Score at Key Stage 4 (GCSE) per pupil between Chichester South Ward and the national average over time. The gap is measured as the point difference against the England average. Areas with a score of greater than 1 are performing better than the national average, while areas with a score of less than 1 are performing below.

## What information is shown here?

The information on this page looks at four types of income category: average household income; average equivalised household income after housing costs; households living in fuel poverty and median net equivalised household PAYE and benefits income. Fuel poverty is said to occur when in order to heat its home to an adequate standard of warmth a household needs to spend more than 10% of its income on total fuel use.

The information boxes on the top right provide an estimate of the number of households in Chichester South Ward below the poverty line and an estimate for the number of households in fuel poverty.

The chart on the right shows the average annual household income estimate (equivalised to take into account variations in household size) across Chichester South Ward and comparator areas before and after housing costs.

Annual household income (Office for National Statistics 2017/18)	Annual household income, after housing costs (Office for National Statistics 2017/18)	Households living in 'Fuel Poverty' Department for Business, Energy and Industrial Strategy (2020)
£42,034	£29,134	330
England Average = £43,966	England Average = £28,248	9.7% of households (England = 13.2%)

## What information is shown here?

The levels of private debt, in the form of unsecured loans and mortgage debt per head, for Chichester South Ward are displayed here.

These figures, available at postcode sector level, are published by UK Finance and account for around 60% of borrowing in the UK. OCSI have modelled this data to Output Areas using an address-based lookup from postcode sector to Output Area in combination with the number of local households and the local population.

The personal debt figure is the total amount of borrowing outstanding on customer accounts divided by the population aged 18+. Personal debt includes all unsecured loans such as credit cards, credit for new cars (eg when buying on finance) and other personal loans. Student debt is not included.

The mortgage debt figure is the total borrowing outstanding on customer accounts for residential mortgages divided by the total number of households.

The SME debt figure is the total amount of borrowing outstanding on customer accounts for Small and Medium-sized enterprises divided by the population aged 18+.

Personal debt per head
<b>£395.0</b>
England Average = £575.8

Residential mortgage debt per head
<b>£32461.6</b>
England Average = £44001.7

SME lending debt per head
<b>£4165.2</b>
England Average = £2101.0

## What information is shown here?

The information in this section shows the concentration of workforce jobs in Chichester South Ward. Workforce jobs are taken from the Business Register and Employment Survey (BRES) which publishes employee and employment estimates based on a survey of approximately 80,000 businesses and weighted to represent all sectors of the UK economy.

The information boxes show the three largest industry groups for workforce jobs based in Chichester South Ward. The bar chart on the top right shows the change in 'Jobs Density' (the number of jobs as a % of working age population) across Chichester South Ward over time. The bar chart on the bottom right shows the share of jobs broken down by public and private sector.

Largest industry sector	Second largest industry sector	Third largest industry sector
Public administration and other services	Retail industry	Education
16.7% of all people in employment	10.2% of all people in employment	9.2% of all people in employment

### What information is shown here?

The information in this section shows the concentration of 'local business units' in Chichester South Ward. 'Local business units' are counts of businesses based on the location of an operational unit. Though larger businesses such as supermarket chains may have their head office in a large city, these figures measure all subsidiaries of that larger enterprise based on where subsidiaries are located. The figures cover all business eligible for VAT (1.7 million businesses in the UK are registered for VAT). These businesses are categorised into 16 broad industry groups derived from the Standard Industrial Classification (UKSIC (2003)).

The information boxes show the three largest industry groups for businesses based in Chichester South Ward. The line chart shows the change in the number of businesses per head of the population across Chichester South Ward over time. The bar chart shows the count of local business broken down by size of business. Businesses are broken down into four employment size bands based on the number of paid employees (0-4, 5-9, 10-19 and 20+ paid employees).

## What information is shown here?

The information on this page shows the accessibility of key services and amenities to people living in Chichester South Ward. Accessibility is measured both in terms of distance and travel times to key services.

The information boxes on the right show average distances (in kilometres) to five key services. The chart on the right shows average travel times in minutes to key services when walking or taking public transport.

The final information box on the right shows the overall Job access score. This measure of connectivity developed by UK Onward includes the number of jobs accessible by car and public transport from every local area (LSOA) in the country across different time horizons. The metric provides the reachable number of jobs and distance with 15 minutes, 30 minutes, 60 minutes and 90 minutes by both driving and public transport for each LSOA. The data incorporates a “door-to-workplace” measure, including every journey stage from time spent walking to the car, driving, to parking and walking to an office - as well as average delays, timetabling and actual journey time on public transport. These measures have been combined into an overall Jobs access score, the weighted average job count, combining driving and public transport. A higher score indicates greater levels of job accessibility. For more information and a link to the research paper please see here: <https://www.ukonward.com/reports/network-effects/>

Average road distance from Job Centre	Average road distance from Secondary School	Average road distance from GP	Average road distance from Pub	Average road distance from Post Office
1.0km	0.9km	0.6km	0.3km	0.6km
England average = 4.6km	England average = 2.1km	England average = 1.2km	England average = 0.7km	England average = 1.0km

Job Access Score (2021)
294535.9
698519.5 average = 698519.5

## What information is shown here?

The information on this page shows two measures of access to the internet. The first measure shows information on broadband take-up, speeds and availability. It has been produced by Ofcom and contains data provided by communications providers. The data shows the average broadband line speed in Chichester South Ward and the proportion of premises in Chichester South Ward with broadband speeds below the Universal Service Obligation (USO) (download speeds at or above 10Mbit/s and upload speeds at or above 1Mbit/s including non-matched records and zero predicted speeds).

The chart on the right shows the proportion of people who responded to the 2011 Census online, compared with the proportion that filled in the Census form on paper in Chichester South Ward. This is a proxy measure of digital engagement as areas with a high proportion of online Census responses are more likely to be digitally engaged than those in areas with low levels of online responses.

Premises with broadband speeds below the USO (2019)	Average broadband download speed (Mbit/s) (2020)	Average broadband upload speed (Mbit/s) (2020)
02	55.71	10.85
0.0% (England average = 1.8%)	England average = 73.40	England average = 12.74
Source: Ofcom 2019 & 2020

## What information is shown here?

The information on this page looks at the characteristics of neighbourhoods across Chichester South Ward as defined using the Output Area Classification (OAC). OAC classifies every area in the country based on a set of socio-demographic characteristics, to provide a profile of areas to identify similarities between neighbourhoods. The information boxes on the right show the number and proportion of neighbourhoods in Chichester South Ward that fall within the eight supergroup categories, detailed below. The chart on the right shows the proportion of areas falling within supergroup categories across Chichester South Ward and comparators.

<b>Rural residents</b>	Rural areas, sparsely populated, above average employment in agriculture, higher number owning multiple cars, an older married population, a high provision of unpaid care and an above average number of people living in communal establishments.
<b>Cosmopolitans</b>	Residing in densely populated urban areas, high ethnic integration, high numbers of single young adults without children including students, high public transport use, above average qualification levels
<b>Ethnicity central</b>	Concentrated in Inner London and other large cities, high ethnic diversity, high proportion of rented accommodation, high proportion of people living in flats, low car ownership.
<b>Multicultural metropolitans</b>	Concentrated in larger urban conurbations in the transitional areas between urban centres and suburbia, high proportion of BME groups, high proportion of families.
<b>Urbanites</b>	Predominantly in urban areas with high concentrations in southern England. More likely to live in either flats or terraces that are privately rented.
<b>Suburbanites</b>	Located on the outskirts, in areas with high owner occupation, high numbers of detached houses, low unemployment, high qualifications and high car ownership.
<b>Constrained city dwellers</b>	Higher proportion of older people, households are more likely to live in flats and to rent their accommodation, and there is a higher prevalence of overcrowding, higher proportion of people in poor health, lower qualification levels and high unemployment
<b>Hard-pressed living</b>	Mostly on the fringe of the UK's urban areas, particularly in Wales and the North of England. High levels of people in terraced accommodation, high unemployment, low ethnic diversity, high levels of people employed in manufacturing

<b>Rural residents</b>	<b>Cosmopolitans</b>	<b>Ethnicity central</b>	<b>Multicultural metropolitans</b>

## What information is shown here?

The information on this page looks at the classification of neighbourhoods across Chichester South Ward in terms of how they interact with the Internet. The Consumer Data Research Centre (CDRC) have developed an Internet User Classification using data from the British Population Survey (BPS), which provides info on the behavioural characteristics of the population regarding various aspects of internet use, which could be linked with demographic data from the census and supplemented with data from online retailers, on online transactions and infrastructure data from OfCom on download speed. Every LSOA in England has been classified into 10 groups (summarised in the table below). The chart on the right shows the proportion of areas falling within each group across Chichester South Ward and comparators.

Source: Alexiou, A. and Singleton, A. (2018). *ESRC Consumer Data Research Centre; Contains National Statistics data Crown copyright and database right (2017); Ofcom data (2016). CDRC data from Data Partners (2017)*

e-Cultural Creators	High levels of Internet engagement, particularly regarding social networks, communication, streaming and gaming, but relatively low levels of online shopping, besides groceries.
e-Professionals	High levels of Internet engagement, and comprises fairly young populations of urban professionals, typically aged between 25 and 34. They are experienced users and engage with the Internet daily and in a variety of settings.
e-Veterans	Affluent families, usually located within low-density suburbs, with populations of mainly middle-aged and highly qualified professionals. Higher levels of engagement for information seeking, online services and shopping, less for social networks or gaming.
Youthful Urban Fringe	Reside at the edge of city centres and deprived inner city areas, ethnically diverse, young, large student and informal household populations, access via mobile devices. High levels of Internet engagement are average over-all, with high levels of social media usage
e-Rational Utilitarians	Comprising mainly rural/semi-rural areas with higher than average retired populations, constrained by poor infrastructure. Users undertake online shopping, the Internet is used as a utility rather than a conduit for entertainment.

Figure: Internet User Classification 2018: Proportion of people living in different types of neighbourhood (by classification type)

e-Mainstream	Exhibit typical Internet user characteristics in heterogeneous neighbourhoods at the periphery of urban areas or in transitional neighbourhoods.
Passive and Uncommitted Users	Limited or no interaction with the Internet. They tend to reside outside city centres and close to the suburbs or semi-rural areas. Higher levels of employment in semi-skilled and blue-collar occupations.
Digital Seniors	Typically White British, retired and relatively affluent. Average use of the Internet, typically using a personal computer at home. Despite being infrequent users, they are adept enough to use the Internet for information seeking, financial services and online shopping.
Settled offline Communities	Elderly, White British, in semi-rural areas. They undertake only limited engagement with the Internet, they may have only rare access or indeed no access to it at all.
e-Withdrawn	Least engaged with the Internet. Deprived neighbourhoods of urban regions. Highest rate of unemployment and social housing among all. Lowest rates of engagement in terms of information seeking and financial services, as well as the lowest rate in terms of online access via a mobile device.

# Communities and environment: Neighbourhood satisfaction & local participation (1) 61

## What information is shown here?

The information on this page shows different measures of people's satisfaction with their neighbourhood and their sense of community cohesion in the neighbourhood. It also shows different measures of people's participation in volunteering and political decision making in the local area. In addition, the information box on the far bottom right shows the number of registered charities per 1,000 population. This is based on location of charities rather than areas where they operate, some of which will have a global focus.

Figures are self-reported and taken from the Place Survey. *The Place survey is collected at Local Authority level so does not include neighbourhood information, and ceased nationally in 2008 so is increasingly out of date.*

Figure: Indicators of community strength  
Source: Place Survey (2008)

"People from different backgrounds get on well together in the local area"	People who feel that they belong to their neighbourhood	People who are satisfied with local area as a place to live	Aged 65+ "satisfied with both home and neighbourhood"
82%	67%	91%	89%
(England = 76%)	(England = 58%)	(England = 79%)	(England = 83%)
People involved in decisions that affect the local area in the past 12 months	People who believe they can influence decisions in their local area	People who have given unpaid help at least once per month over the last 12 months	Total registered charities (2021)
22%	32%	32%	10.9 per 1,000 population
(England = 14%)	(England = 29%)	(England = 23%)	(England = 2.8 per 1,000)

## What information is shown here?

The page shows the Community Dynamics indicators for Chichester South Ward. The Community Dynamics data set (<https://www.communitydynamics.social-life.co/>) has been developed by Social Life with the aim of quantifying how people feel about the area they live in.

By modelling responses from the annual Community Life Survey and Understanding Society Survey to Output Areas, Social Life have created small area measures of: **strength of local social relationships**, **strength of belonging to a local area** and **satisfaction with a local area as a place to live**. Positive values represent greater belonging/relationship strength/satisfaction than the national average. Negative figures represent less belonging/relationship strength/satisfaction than the national average.

Please note that these indicators have been created by combining the survey responses of samples of the population and modelling these to Output Areas by linking survey sample demographics to the demographics of Output Areas. As a result, many implicit assumptions are built into the data which will not hold for all areas. The values presented here offer an indication of community belonging, strength and satisfaction rather than an absolute measure.

The fourth information box shows the valid voter turnout (%) at the most recent Local Council Elections. Because the electoral cycle varies in different parts of the country (with associated impacts on turnout) the turnout figures from previous years have been adjusted either upwards or downwards from the 2019 average. This is in order to reflect variation in turnout across different years. For example if turnout was 30% in 2018 and 35% in 2019 then each area in 2018 would be revised upwards using the following calculation  $35/30 = 1.166 \times 2018 \text{ turnout}$ .

Local social relationships	Belonging	Satisfaction with local area as a place to live	Voter Turnout at Local Elections (%)
-0.009	0.002	-0.003	33.9
(England = -0.006)	(England = -0.011)	(England = 0.001)	(England = 33%)

### What information is shown here?

The information on this page shows background concentrations from four air pollutants: nitrogen dioxide, benzene, sulphur dioxide and particulates. The air quality data was collected for 2016 on a 1km grid and obtained from the UK National Air Quality Archive for use in the Indices of Deprivation 2019. A higher score indicates a higher concentration of the pollution with a score of greater than 1 indicating that the levels of pollution exceed national standards of clean air.

The fifth information box shows the total carbon footprint per person in units of kilograms of carbon dioxide equivalent. This data is sourced from the place-based carbon calculator. For more information please visit: <https://www.carbon.place/>.

Figure: Air pollution concentrations for four pollutants

## What information is shown here?

Ordnance Survey (OS) publish the locations and extent of green spaces that are likely to be accessible to the public. The data include the following types of green spaces: allotments or community growing spaces, bowling greens, cemeteries, religious grounds, golf courses, other sports facilities, play spaces, playing fields, public parks or gardens and tennis courts.

OCSI have intersected OS Open Greenspaces data with Output Area boundaries to produce data for the greenspace per standard geographical area (eg OA, LSOA, LA).

Two green space measures are shown here. The **total green space** (which includes all types of green space) and the **public parks and gardens green space** (only public parks and gardens).

Large rural areas such as National Parks are not included in the OS Greenspace dataset. Religious grounds are included where there is seen to be a significant amount (>500m<sup>2</sup>) of accessible greenspace. Sports stadiums and grounds which are primarily for spectating rather than participating in sports are not included. Playing fields should only be included in OS Greenspace dataset where they are used by the public at least some of the time. Playing fields such as school fields which are entirely enclosed and only for use of the school, would not be expected to be included.

Wooded areas that function as public parks (i.e. are freely accessible to the public in their entirety and are managed for recreation) should be included, however, the constraints of the capture method employed to create the data mean that in many cases these may not yet be included.

OS data © Crown copyright and database right 2017

Total green space	Public parks and gardens greenspace
7.0%	0.55%
19.0 hectares (England average = 2.2%)	1.5 hectares (England average = 0.8%)

## What information is shown here?

The Community Needs Index that was developed to identify areas experiencing poor community and civic infrastructure, relative isolation and low levels of participation in community life. The index was created by combining a series of 19 indicators, conceptualised under three domains: Civic Assets, Connectedness and Active and Engaged Community. A high score indicates that the area has high levels of need.

- **Civic Assets:** measures the presence of key community, civic, educational and cultural assets in a close proximity of the area. These include pubs, libraries, green space, community centres, swimming pools – facilities that provide things to do often, at no or little cost, which are important to how positive a community feels about its area.
- **Connectedness:** measures the connectivity to key services, digital infrastructure, isolation and strength of the local jobs market. It looks at whether residents have access to key services, such as health services, within a reasonable travel distance. It considers how good public transport and digital infrastructure are and how strong the local job market is.
- **Active and Engaged Community:** measures the levels of third sector civic and community activity and barriers to participation and engagement. It shows whether charities are active in the area, and whether people appear to be engaged in the broader civic life of their community.

Community Needs Score	Civic Assets score	Connectedness score	Active and engaged community score
37.2	3.6	29.6	4.0
(England average = 68.4)	(England average = 23.2)	(England average = 21.3)	(England average = 23.9)

## What information is shown here?

This page looks at funding and includes data on the National Lottery Fund and grant funding from national grant giving organisations.

National Lottery Community Fund figures on this page are taken from data on grants made to projects and organisations in local areas in the UK by the National Lottery Fund, modelled down to standard statistical geographies from ward grants data published by Big Lottery in conjunction with the 360Giving initiative. National Lottery used the 360Giving standard to produce a dataset of all the grants made from 2004-2021. Please note this excludes grants greater than 1 million in order to focus on community grants.

The fourth information box shows the total combined grant funding from the largest national grant giving organisations whose data has been subject to the 360giving standard. The data is based on the location of grant recipients rather than the location of beneficiaries. Organisations included: Sport England, The Henry Smith Charity, The Tudor Trust, Lloyds Bank Foundation for England and Wales, Barrow Cadbury Trust, Department for Transport, Esmée Fairbairn Foundation, Masonic Charitable Foundation, Nationwide Foundation, Co-operative Group, Paul Hamlyn Foundation, Woodward Charitable Trust, Power to Change, The Dulverton Trust, Virgin Money Foundation, The Clothworkers Foundation, A B Charitable Trust, Seafarers UK, Three Guineas Trust, Nesta, The Joseph Rank Trust, National Churches Trust, LandAid Charitable Trust, True Colours Trust, Pears Foundation, Wates Family Enterprise Trust, The Blagrove Trust, Tuixen Foundation, Samworth Foundation, Tedworth Charitable Trust, Road Safety Trust, Wates Foundation, Staples Trust, The David & Elaine Potter Foundation, Gatsby Charitable Foundation and ZING.

For more information on the 360Giving data format and initiative please visit [www.threesixtygiving.org/](http://www.threesixtygiving.org/)

National Lottery Community funding per 1,000 population (2004-2021)	National Lottery Community Fund (Individual grants issued per 10,000 population) (2004-2021)	Total grants awarded from major funders (in £1000s) (2019)
<b>£679,098</b>	<b>0,035</b>	<b>£01,279,843</b>
(£90222 per 1,000) England average = £38346 per 1,000	(46 per 10,000) England average = 30 per 10,000	(£170 per head) England average = £34 per head

### *How we have identified the “Chichester South Ward” area*

This report is based on the definition of the “Chichester South Ward” area (this area can be viewed on the Local Insight map, through finding the area on the ‘show services’ dropdown in the top left hand corner of the map. We have aggregated data for all the neighbourhoods in “Chichester South Ward” to create the data used in this report.

Alongside data for the “Chichester South Ward” neighbourhood we also show data for selected comparator areas.

### *Data in this report is based on regularly updated open data published by government sources*

All the data in this report is based on open data published by more than 50 government agencies, collected and updated by OCSI on weekly basis. Data is updated on regular basis, with the reports and mapped data on the website reflecting the latest available data.

Details of the individual datasets are provided on the pages where the data is presented, with information on dates and sources presented alongside the charts and tables. On the website, information about each source is available on the popup “About the indicator” link at the top-right of the map.

### *Standard geographies used in this report*

**Super Output Areas (SOAs):** SOAs are a statistical geography created for the purpose of presenting data such as the Census, Indices of Deprivation, and other neighbourhood statistics. There are two layers to the SOA geography: ‘lower layer’ (LSOA) and ‘middle layer’ (MSOA). SOAs are designed to produce areas of roughly equal population size - 1,500 people for LSOAs and 7,200 for MSOAs. The majority of data used in this report is based on LSOA boundaries; of which there are 32,844 in England (there were changes to around 4% of LSOA definitions in Census 2011).

**Output Areas (OAs):** OAs are a more detailed statistical geography than SOAs, with each covering around 300 people, or 120 households. There are 171,372 OAs in England (there were changes to around 5% of OA definitions in Census 2011).

**Wards:** A small number of datasets are published at ward level. These are on average four times larger than LSOAs. Data is less detailed than LSOA level datasets and wards vary greatly in size, from less than 200 residents (Isles of Scilly), to more than 36,000 residents (in Sheffield).

**Local Insight** gives you the data and analysis you need to ensure your services are underpinned by the best possible knowledge of local communities, leveraging the power of information right across your organisation, from high-level visualisations for Board level to detailed reports on local neighbourhoods. Saving you time and money, Local Insight gives you the most relevant and up-to-date data on the communities where you work, with no need to invest in specialist mapping and data staff, consultancy or software. See <http://local.communityinsight.org/> for more information.

Local Insight is developed by OCSI, based on a project that was jointly developed by HACT and OCSI.

**OCSI** work with public and community sector organisations to improve services. We turn complex datasets into engaging stories; making data, information and analysis accessible for communities and decision-makers. See [www.ocsi.co.uk](http://www.ocsi.co.uk) for more information.

# AGENDA ITEM 11

## Whyke Estate questionnaire

### Final results

August 2022

#### Responses

We received 142 responses to the main survey.

#### Community assets

We asked: What three things do you like most about the Whyke Estate?

Outdoor green spaces	75
Community/people	63
Quiet/peaceful area	44
Shops	38
Location - proximity to town centre	30
School	13
Safe	10
Other	7
Good for families	6
Other amenities	6
Nice place to live	5
Transport links	5

# AGENDA ITEM 11

Many of the houses are built around an area of greenspace, known as the oval which includes a play park, football pitch, games area and a bandstand. These spaces were mentioned by many respondents as things that they feel are good about the area with them either collectively, or individually being mentioned 75 times.

Community/people also featured among many responses. This type of response included general community spirit, the area being 'friendly', good relations with neighbours, people helping each other and a feeling of familiarity where people 'know everyone' and there are many long-time residents. In total this was mentioned 63 times.

The third highest category was Quiet/peaceful area, with this occurring 44 times. Many respondents simply used the word quiet when referring to what they liked about the area. Two respondents pointed to the area not being on a main road as contributing to this. Additionally, some residents mentioned that they felt the area was safe and good for families.

The local shops were referred to as a positive by many residents, occurring 38 times. This includes the Post Office and the Premier Shop though often respondents simply mentioned 'local shops'.

Proximity to the town centre was also rated as a positive, with 30 mentions. Whyke is within walking distance of the Town centre and its amenities and this appeared to be highly valued by the residents who responded to the questionnaire.

The school received 13 mentions. Located in the area Kingsham Primary is an important institution in the community.

In summary the results give a good picture of what residents feel are the key strengths of the area. They value its prominent green space, its friendly atmosphere and sense of peacefulness and quite, being away from main roads. They feel that in the main it is a safe area which is good for families and where children can enjoy playing in the open spaces. They value the service provided by the local shops and school and also enjoy close proximity to the town centre and its good transport links.

# AGENDA ITEM 11

## Improvements to Whyke

Which ideas would you most like to see developed?

Activities for young people	93
Community events	55
Neighbourhood watch	53
Litterpicking	52
More benches	48
Sports activities	41
Planting more trees	40
Work on gardens	37
Coffee mornings	34
Information/advice sessions	29
Community allotments	27
Community fridge/pantry	22
Uniform and clothes swapshop	20

Residents were presented with a list and asked to select the ideas they would most like to see developed. Activities for young people emerged as a clear favourite with 93 residents selecting this (this equates to some 65% of responses).

Other highly rated options, each receiving over 50 votes, were community events, neighbourhood watch and litterpicking.

Physical improvements to the area such as more benches, planting more trees and work on gardens were roughly middle ranked whilst what can be broadly termed as support services such as information and advice sessions, community pantry and uniform and clothes swapshop appeared to be among less popular options, though even these attracted at least 20 votes.

# AGENDA ITEM 11

## Other thoughts and ideas to make Whyke better

Policing	13
Parking	12
ASB	11
More activities for children/ young people	11
Speeding/traffic calming	10
Other	9
Park improvements	9
More events/ use of the green	8
Community centre	8
Grass cutting/maintenance	6
Cinema event	5
Bins	4
Community development	3
Transport	2

This was a free text section of the questionnaire allowing respondents to use their own words. Responses were then coded into themes. Many responses used this section to raise issues as well as proposing ideas.

Several key themes emerged. Policing featured highly among those who completed this with requests for more policing, such as increased patrols or community-based policing in the area. This could be seen to be linked to two additional prominent themes around ASB and speeding. In terms of ASB one respondent advised they were moving out of the area due to ASB. Two responses referred to parenting, three mentioned drug use and another mentioned broken glass and bad language in the park. In another section of the survey one respondent also mentioned 'bullying' taking place on the green.

# AGENDA ITEM 11

Parking was an issue which emerged from this section with some respondents mentioning issues around school drop off and pick up times as well as a lack of parking spaces.

Reflecting the findings of the previous section there was a visible appetite for more activities for children and young people.

## Under 18's survey

### Responses

32 young people completed the under 18s questionnaire

### Which three things do you use most on the Whyke estate?

When asked this 14 young people mentioned the park and 9 the shop with 4 mentioning the bandstand suggesting these are important places for young people in the area.

### Activities in the area you would like to see

# AGENDA ITEM 11

Movie night	23
Upgrades to play areas	20
Sports activities	17
Events on the green	16
Youth club	12
Baking/ food related	11
Art and craft	9
Bike marking maintenance	7

When asked what activities they would like to see in the area movie night emerged as a favourite with 23 young people selecting this option (over 70% of responses) followed by upgrades to play areas.

When asked to specify which upgrades they would like to see seven respondents mentioned a zipwire and six mentioned swings – two of these specifically mentioning swings for older children (another response mentioned that the park needed more things for older children), four mentioned a skatepark and three a trampoline.

Zipline	7
Swing	6
Skatepark	4
Trampoline	3

When specifying sports activities football proved most popular with eight mentions and rounders three mentions. Rugby and archery received two mentions. Others which received one mention were fencing, crazy golf, netball and volleyball.

Football	8
Rounders	3
Rugby	2
Archery	2

## Summary of findings

Through the questionnaires residents of Whyke pointed to the value that they place on the green spaces which are a prominent feature of the area. They indicated that they also generally enjoy good relations with neighbours and other people in the area and like the sense of community. They describe the area as being quiet, peaceful and safe. Residents feel well served by local shops, by the primary school and enjoy living in close proximity to the amenities offered by the town centre.

Residents indicated a strong appetite for more activities for young people and also welcomed suggestions for more community events, neighbourhood watch and litterpicking.

Issues residents raised chiefly involved ASB, speeding and parking. For a small number ASB appeared to be particularly acute and involved behaviour of young people. Parking appeared to be a particular issue around school drop off and pick up times

# AGENDA ITEM 11

## **Next steps:**

Overall, 63 respondents to the adults survey and 4 respondents to the under 18's survey indicated they would like to be involved in looking at ways to improve the area. A next step is to involve these individuals and others in the community in developing plans for the area.

## Description and location

The property comprises a brick built 3-storey property in a parade of 4 shops located in a residential area approximately 1½ miles southeast of Chichester City Centre. The ground floor shop measures approximately 56.36 sq m (606 sq ft) The 2-storey maisonette comprises a hallway, living room, dining room and kitchen on the first floor with 3 bedrooms and a separate bathroom/WC on the second floor.

## Use

The previous use of the premises was as an Indian Takeaway. The permitted use of the ground floor under the Town and Country Planning (Use Classes) order 1987 as amended by the changes to the Use Classes Order and General Permitted Development Order April 2005 is A5 (Sui Generis under the 2020 update). A number of alternative uses may be appropriate (subject to planning permission). The use must however be complimentary to the use of the other shops in the parade.

## Terms

The property is available to let by way of a new (effectively) full repairing and insuring lease of a minimum of 7 years at a guide price of £21,000 p.a. exclusive. The lease will be contracted out of the provisions of the Landlord and Tenant Act 1954 Sections 24-28.

## Energy Performance Certificate (EPC)

The shop has an EPC rating of C  
The flat has an EPC rating of C

## Rates/ Council Tax

2 Hardham Road

Rateable Value: £3,400

The current tax year's charge is £1,740.80

2a Hardham Road

The current Council tax year's charge is £1,571.52 (Band B)

## Repairs and maintenance

The tenant is to be responsible for all repairs other than those that are the subject to a service charge or recharge of the council's costs of undertaking the work on a common basis.

## Service charge

There is an annual service charge payable by quarterly instalments to cover external repairs and maintenance of the entire building, as well as maintenance and repair of the common parts.

## Outgoings

The lessee will be responsible for rates, utilities, reimbursement of the insurance costs (which will be invoiced to the tenant directly by the Council), insurance of contents and any other outgoings that may be applicable.

## Rent deposit / guarantee

The council will require both a rent deposit and a guarantor as guarantee for the rent and tenant obligations.

## Viewing

Prospective tenants wishing to be considered for a tenancy of this property should contact the Estates Service at;

- Chichester District Council
- East Pallant House
- 1 East Pallant
- Chichester
- West Sussex, PO19 1TY
- 01243 534632
- [estatesservice@chichester.gov.uk](mailto:estatesservice@chichester.gov.uk)
- <https://www.chichester.gov.uk/commercialproperty>

Viewing is by appointment only.

## Costs

The incoming tenant will be responsible for the Council's Surveyors and Legal costs in the preparation and granting of this lease.
